

RELIABILITY BUILT IN™

# — T&S CARTRIDGE UPDATES —

Over the last few years T&S has launched a series of modern updates to our product line. This process has taken a phased-in approach, meaning that both the original and the new item are available for purchase for an overlapping period of time. The goal of this approach is to allow our customer base time to transition their inventory from the original part number to the new-style part number. It is important for all to understand that the original items will not be available after **January 1, 2021**.

- **All New Cartridges Come Standard With Cross Flow Prevention.**  
*T&S is pleased to announce that all new cartridges will come standard with cross flow prevention. The cartridge standardization reduces the number of SKUs stocking customers inventory. This change will ensure that all units requiring cross flow prevention receive the correct replacement cartridge in the field. (For example: Pre-rinse units and service sink faucets must include cross flow prevention). Get ahead of the January 2021 date and begin stocking all new style (NS) cartridges now.*
- **No Pricing Changes.**  
*All crossover models are priced equally to the old style models.*
- **Old to New Parts Are Completely Interchangeable.**  
*The complete list of affected parts is available on the reverse of this flyer.*
- **New Style Part Numbers Have Been Updated to Reflect Product Line Changes.**  
*In most cases the crossover part number will remain the same with the addition of "NS" to the end of the model number.*  
  
*One exception to this rule applies to cartridges that did not originally include cross flow prevention. In this case, the crossover model will be a unique part number.*
- **Old Part Numbers Will Be Available Until January 1, 2021.**
- **Two New Non-Spring Check Cartridges Created.**  
*Note: 002713-40NS and 002714-40NS have been created for customers wishing to order a non-spring check, non-quarter turn cartridge with the new style bonnet and handle.*
- **Crossover List Available Electronically.**  
*Please remind your customers and contacts to update their systems to the new model numbers. Contact customer service for an Excel file of all affected parts if needed: [customerservice@tsbrass.com](mailto:customerservice@tsbrass.com) or 1-800-476-4103.*
