

Schools & Education

Schools & Education

For decades, T&S Brass has been supplying quality faucets and plumbing products to a wide variety of markets, including schools and education. With more than 60 years in the market, T&S has a deep understanding of the special challenges of schools and education settings, and has a range of products to help meet these unique needs.

“Lead-free” — Legislation in several states restricts the amount of lead in plumbing fixtures to less than .25 percent. T&S makes a complete line of products compliant with these requirements, and all are suitable for use in schools.

Antimicrobial — Hygiene is an important consideration in a school setting, with parts and products that clean easily and stay more sanitary between washings. T&S makes a line of products with antimicrobial coating, keeping plumbing surfaces cleaner by inhibiting the growth of microbes that can cause illness.

Vandalism resistant — The durability and quality of T&S products make them natural choices for school environments in which vandalism or abuse may occur. We test our products through millions of cycles to ensure their longevity, and use heavy-duty castings that can take abuse. In addition, some products are available with locking aerators or handles to discourage vandalism.

Water and energy conservation — T&S has been a leader in water conservation for decades with various low-flow products, sensor and metering faucets, and low-leak cartridges. And with water savings comes energy and cost savings as well, because less water needs to be heated in the cafeteria or lavatory faucets.

Labs, locker rooms and cafeterias — We got our start creating pre-rinse units for foodservice use, but now make products specific to a wide range of applications in a school setting. T&S has quality products for labs, drinking fountains, gym showers, cafeterias, and even shop class.

See the inside illustration to get an overview of where T&S products have been engineered to meet these needs and more in a typical school setting.

Why choose T&S?

Quality and durability. T&S products are highly recognized throughout the industry as well-built, long lasting and durable. We test our products through millions of test cycles before failure – far more than regulations require, and far more than our competitors.

Interchangeability. We create our parts to “mix and match,” making it easy to order the ideal product for any need. And part stocking is simplified, as there are fewer proprietary replacement parts to keep on hand.

Water conservation. T&S has been a leader in water conservation for decades, before “green” was “in.” We now offer more water-saving components

than ever before, including one of the world's highest-performing and lowest water use pre-rinse spray valves.

Family owned. Although we've been growing for more than 60 years, we're still family owned, helping us to move quickly to take care of our customers in a personal way that the giants can't match.

Fast shipping. Our exclusive 24-hour Quick Ship program ensures that orders received before noon are processed the same day.

About T&S

With a steadfast commitment to quality, T&S Brass has set industry standards for more than 60 years and introduced a number of plumbing innovations, including the market's first pre-rinse unit and the foot pedal valve.

Today, T&S manufactures and sells faucets, fittings, and specialty products and accessories for foodservice, industrial, commercial plumbing, and laboratory markets. Its products have become the standard for the majority of U.S. hospitals, schools, restaurants, prisons, and public facilities.

At our headquarters in Travelers Rest, SC, our associates take pride in consistently delivering the finest in craftsmanship and service. We produce more than 5,000 quality products and parts that meet the requirements of the Buy American Act.

T&S sells meticulously designed and rigorously built products on nearly every continent. Still family owned and operated, reliability remains the fundamental principal behind everything we do.
