

THE LONG-TERM VALUE OF LOW-FLOW

Low-flow T&S products such as spray valves, aerators, metering cartridges and electronic sensor faucets can yield particularly large savings for years to come – all for a relatively small upfront investment.

Did you know?

Low-flow products perform equally as well as higher-flow alternatives

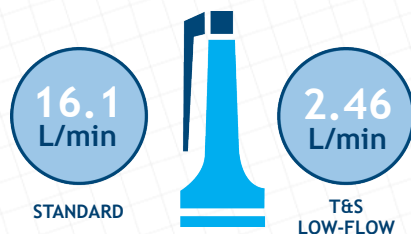

Aerators can save facilities tens of thousands of liters per year, per installation:

13,262 liters saved annually
66,310 5-year savings per installation *

* 3 employees/day. 8 handwashes/employees/day.
365 operating days per year. 20 seconds per handwash.

Low-flow pre-rinse spray valves can save hundreds of thousands of liters per year, per installation:

895,325 liters saved annually
4,476,625 5-year savings per installation *

* 3 operating hours a day. 365 operating days per year.

ELECTRONIC SENSOR FAUCETS

SAVE
3.79 L
PER HANDWASH

METERING CARTRIDGES

20%
LESS WATER
PER HANDWASH
