

# UK-0107 Spray Valve

Available for all of Europe

The UK-0107 Spray Valve was initially designed for the British markets, but it is applicable to all T&S pre-rinse units (with a B- or EU-prefix) and great for heavy use in commercial kitchens.

It is the blue international version of our #1 top-selling B-0107 pre-rinse spray valve and has the same "cat eye" spray pattern with a single spray point to create higher force to allow for faster cleaning; Ideal for when you need a superior quality spray valve suited for most general applications with a focus on sustainability, and want it to be backed by decades of trusted satisfaction.

UK-0107 4.35 L/min

## Features & Benefits:

- Designed for heavy-duty use in Industrial kitchens
- 4.35 L/min spray valve
- Shuts off when handle is released
- Hold down ring
- 3/4-14 UN male inlet fitting

Material: Polished chrome plated brass body and rubber bumper

Warranty: One Year (Limited)

## Product Compliance:

- 2019 DOE PRSV - Class II
- NSF 372 (Low Lead Content)
- NSF 61 - Section 9
- ASME A112.18.1 / CSA B125.1

## Performance Data:

- Pressure: 1.4 – 8.6 bar (20 – 125 psi)
- Temperature: 4.5 – 60 Celsius (40°F – 140°F)
- Flow Rate: 4.35 L/min @ 4.14 bar (1.15 GPM @ 60 psi)
- Spray Force: 2.0 N @ 4.14 bar (7.5 Ozf @ 60 psi)

## DID YOU KNOW?

Spray force is defined as the physical force of the spray measured during testing. This measurement typically increases with higher flow rates.

UK-2DP12

RELIABILITY BUILT IN™

# Think you're saving by not going with T&S?

Think again... by investing in T&S, you are investing in your business:

## Equal or Better Cleaning Efficiency

- T&S had better spray force than 50% of competitors, even with a lower flow rate

## Lower Water-Related Costs (including Heating Costs)

- UK-0107's flow rate: 4.35L/min
- Average flow rate of competitors: 10.29 L/min
- 5.94 Litres per minute saved by switching to T&S
- Up to 11 L/min difference between T&S and the highest competitor tested

## Quickest ROI and Best Cost of Ownership

- UK-0107 lasted 2 million cycles in life cycle testing
- The average competitor lasted only 504,649 cycles
- UK-0107 lasted nearly 3 times as long as the next best competitor spray valve (838,156 with leaks) and almost 7 times longer than the lowest
