T&S WRAS Approved Low-Profile Pre-Rinse Units

A practical addition to the T&S family of WRAS approved product, we are glad to introduce the **T&S WRAS Approved Low-Profile Pre-Rinse Units**

Our product families are based on body types and temperature options:

- 1DLN - single hole, deck mounted with single temperature only
- 2DLN - single hole, deck mounted with dual temperature control (2 levers, hot and cold)
- 7DLN - two-hole 7", deck mounted with dual temperature control

Additionally, you can select from one of the three Add-On-Faucet options:

- No add on faucet
- 6" add on faucet
- 8" add on faucet

Depending on your desired flow-rate, we also offer 3 Spray Valve beginning with the following prefixes:

- UMPK – with the UK-0107 valve (4.35L/min flow rate)
- UMPM – with the EB-0107-J valve (4.05L/min flow rate)
- UMPU – with the EB-0107-C valve (2.46L/min flow rate)

WITH 45 VARIATIONS, we're certain you will find the right low-profile pre-rinse unit for your facility.

To order these or any of the hundreds of other WRAS approved T&S products or for further questions, please contact:
