

# WHAT GOES INTO A T&S PRODUCT

T&S products are designed, manufactured and tested to meet the highest standards for quality, reliability and performance.

## PRE-RINSE UNITS

Stainless steel hoses feature double interlocked covers and reinforced inner tubing

## CONCEALED WIDESPREAD FAUCETS

Shorter installation times with EasyInstall, optional plain end spouts feature flow control in base

## HOSE REELS

Spray valve swivel prevents torque on hose while anti-lockout feature retracts hose even if fully extended

## CARTRIDGES

Both Cerama and compression models come standard with cross-flow prevention

### COMMERCIAL-DUTY PRODUCTS

Our high-quality products feature professional-grade materials for durability you can see and feel.

# 50%

### THICKER NOZZLES

T&S nozzles are 50% thicker than the competition, delivering greater strength and reliability over time.

### MODULAR DESIGN

T&S engineers products and parts that can mix and match, providing solutions for virtually any application.

# 100%

### PRODUCTS TESTED

Every single product is air- or water-tested for quality, not just a random sampling.

### ISO 9001 CERTIFIED

T&S was among the first commercial plumbing manufacturers to receive this stringent and internationally recognized quality management certification.
