

Finding Success with T&S:

Bemus Point Golf Club & Tap House

Selecting a supplier for kitchen plumbing equipment means weighing performance, reliability, availability, convenience, service and cost.

When Bemus Point Golf Club & Tap House, in Bemus Point, NY, underwent a complete restaurant renovation, new owners Bryce and Rachel Steffen considered all those factors and chose T&S Brass.

The renovation included a redesign of the entire building and offered the Steffens a chance to build their new kitchen from scratch.

“Getting a good product that was reliable and functioned when we needed it to was our primary concern,” Bryce Steffen said. **“T&S is a quality product with a great reputation,** and it was an easy decision to go with them.”

Performance on Point

The redesigned Bemus Point restaurant includes T&S Brass **pre-rinse units** at prep and dish sinks, a **pot filler** at the stove and **faucets for the bar sinks**.

“When it comes to commercial kitchens, **T&S has a lot more to offer, and the quality is better** frankly,” said Mark Johnson of Johnson-Whitmeyer Plumbing, who worked on the project.

And getting the products quickly was important for Mike Steffen, the project’s general contractor.

“T&S’ same-day shipping means I get what I need quickly and keep the flow of work going,” he said. “Other brands have longer lead times, and I don’t have time to wait.”

Since opening in May 2018 for a busy tourist season, the restaurant has put the T&S products through their paces.

“The day-to-day operation is seamless,” Bryce Steffen said. “The pre-rinse units remove cooked-on debris easily and save our kitchen time and hassle.”

“We give T&S five stars.”
