

Convenience Store

Convenience Store

For decades, T&S Brass has been supplying quality faucets and plumbing products to a wide variety of markets, including convenience stores. With more than 60 years in the market, T&S has a deep understanding of the special challenges of c-stores and has a range of products to help meet these unique needs.

Antimicrobial — Hygiene is an important consideration in a c-store setting, especially in food prep and restroom areas where sanitary fixtures make a big difference. T&S makes a range of products with antimicrobial coating that cleans easily and keeps plumbing surfaces more sanitary by inhibiting the growth of microbes that can cause illness.

Vandalism resistant — T&S provides a variety of products in vandal-resistant models to help protect your stores against theft and damage. We test our products through millions of cycles to ensure their longevity, and use heavy-duty castings that can take abuse. From aerators and faucets to showerheads and spray valves, you can count on T&S to deliver reliable products with built-in protection. After all, it's better safe than sorry.

Water and energy conservation — T&S leads the way in water conservation with various low-flow products, such as sensor and metering faucets, low-leak cartridges, pre-rinse spray valves and aerators. C-stores choose our water-saving products for restrooms, kitchens, maintenance rooms and beyond. And with water savings comes energy and cost savings as well. Every gallon of water conserved is one less gallon of water to heat, dispose of and pay for.

Foodservice to service bays — From public restrooms and shower rooms, to quick meals and car service, c-stores serve a wide range of customer needs. T&S has quality plumbing products to support the varied facilities of these retailers. We offer a spectrum of fixtures, faucets and everything in between to help them serve customers and be more profitable.

See the inside illustration to get an overview of where T&S products have been engineered to meet these needs and more in a typical c-store setting.

Why choose T&S?

Quality and durability. T&S products are highly recognized throughout the industry as well-built, long-lasting and durable. We test our products through millions of cycles before failure — far more than regulations require, and far more than our competitors provide.

Interchangeability. We create our parts to “mix and match,” making it easy to order the ideal product for any need. And part stocking is simplified, as there are fewer proprietary replacement parts to keep on hand.

Fast shipping. Our exclusive 24-hour Quick Ship program ensures that orders received before noon are processed the same day.

“Lead-free.” Legislation in several states, which will also be national by January 2014, restricts the amount of lead in plumbing products designed to deliver water for human consumption to less than .25 percent. T&S’ entire product line is already compliant with pending national requirements.

Family owned. Although we’ve been growing for more than 60 years, we’re still family-owned, helping us to move quickly to take care of our customers in a personal way that our competitors can’t match.

About T&S

With a steadfast commitment to quality, T&S Brass has set industry standards for more than 60 years and introduced a number of plumbing innovations, including the market's first pre-rinse unit and the foot pedal valve.

Today, T&S manufactures and sells faucets, fittings, specialty products and accessories for foodservice, retail, commercial plumbing and laboratory markets. Its products have become the standard for many facilities worldwide.

At our headquarters in Travelers Rest, SC, our associates take pride in consistently delivering the finest in craftsmanship and service. We produce more than 5,000 quality products and parts that meet the requirements of the Buy American Act.

T&S sells meticulously designed and rigorously built products on nearly every continent. Still family-owned and operated, reliability remains the fundamental principle behind everything we do.
