

THE LONG-TERM VALUE OF LOW-FLOW

Low-flow T&S products such as spray valves, aerators, metering cartridges and electronic sensor faucets can yield particularly large savings for years to come – all for a relatively small upfront investment.

Did you know?

Low-flow products perform equally as well as higher-flow alternatives

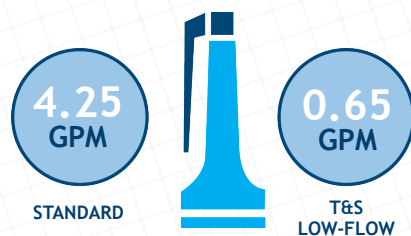

Aerators can save facilities thousands of gallons per year, per installation.

3,504 gallons saved annually
17,520 5-year savings per installation *

* 3 employees/day. 8 handwashes/employees/day.
365 operating days per year. 20 seconds per handwash.

Low-flow pre-rinse spray valves can save hundreds of thousands of gallons per year, per installation:

236,520 gallons saved annually
1,182,600 5-year savings per installation *

* 3 operating hours a day. 365 operating days per year.

ELECTRONIC SENSOR FAUCETS

SAVE
1.0 G
PER HANDWASH

METERING CARTRIDGES

20%
LESS WATER
PER HANDWASH
