Restaurants

For decades, T&S Brass has been supplying quality faucets and plumbing products to the restaurant and foodservice market. With more than 60 years in the foodservice market from QSR to fine dining, T&S has a deep understanding of the special challenges of the restaurant setting. We have a range of products to help meet these unique needs.

“Lead-free” — Legislation in several states restricts the amount of lead in plumbing fixtures to less than .25 percent. T&S makes a complete line of products compliant with these requirements for foodservice establishments that want to reduce the potential for even minimal lead exposure.

Water and energy conservation — T&S has been a leader in water conservation for decades with various low-flow products, sensor and metering faucets, and low-leak cartridges. Our pre-rinse units have long been the standard of the industry while still delivering class-leading cleaning times. And important to any restaurant owner is the energy and cost savings that accompany water savings: every gallon of water not used is one less gallon of water to heat or dispose of.

Antimicrobial — Hygiene is an important consideration in a restaurant setting, especially in the restroom areas where users expect sanitary fixtures. T&S makes a line of products with an antimicrobial coating. This coating cleans easily and keeps plumbing surfaces more hygienic by inhibiting the growth of microbes that can cause illness.

From kitchen to restroom — As a leader in foodservice plumbing, T&S has quality products for all aspects of the kitchen, including pot fillers, glass fillers, faucets, pre-rinse units, gas hoses, and washdown hose reels. And we can help keep restrooms cleaner with sensor and metering faucets.

See the inside illustration to get an overview of where T&S products have been engineered to meet these needs and more in a typical restaurant setting.

Why choose T&S?

Quality and durability. T&S products are highly recognized throughout the industry as well-built, long lasting and durable. We test our products through millions of test cycles before failure – far more than regulations require, and far more than our competitors.

Interchangeability. We create our parts to “mix and match,” making it easy to order the ideal product for any need. And part stocking is simplified, as there are fewer proprietary replacement parts to keep on hand.

Water conservation. T&S has been a leader in water conservation for decades, before “green” was “in.” We now offer more water-saving components than ever

before, including one of the world's highest-performing and lowest water use pre-rinse spray valves.

Family owned. Although we've been growing for more than 60 years, we're still family owned, helping us to move quickly to take care of our customers in a personal way that the giants can't match.

Fast shipping. Our exclusive 24-hour Quick Ship program ensures that orders received before noon are processed the same day.

About T&S

With a steadfast commitment to quality, T&S Brass has set industry standards for more than 60 years and introduced a number of plumbing innovations, including the market's first pre-rinse unit and the foot pedal valve.

Today, T&S manufactures and sells faucets, fittings, and specialty products and accessories for foodservice, industrial, commercial plumbing, and laboratory markets. Its products have become the standard for the majority of U.S. hospitals, schools, restaurants, prisons, and public facilities.

At our headquarters in Travelers Rest, SC, our associates take pride in consistently delivering the finest in craftsmanship and service. We produce more than 5,000 quality products and parts that meet the requirements of the Buy American Act.

T&S sells meticulously designed and rigorously built products on nearly every continent. Still family owned and operated, reliability remains the fundamental principal behind everything we do.
